

Programme Directory

Two series. Eight programmes. One promise.

Future Edge Institute trains the AI Factory workforce. The AI Adoption Series takes an organisation from talking about AI to using it. The AI Operator Professional Series teaches individuals to build and run the AI systems themselves. Every programme ends with something built, tested and working.

THE AI ADOPTION SERIES · FOR ORGANISATIONS

Two hands on workshops, delivered in person at your premises or ours. Participation based, with a digital certificate issued within 24 hours. Run them in sequence for a full adoption programme, or independently.

CODE	PROGRAMME	WHO IT IS FOR	LENGTH
101	AI for Leaders: Executive ROI Strategy	CEOs, C-suite, business unit heads	2 days
102	AI at Work: From Awareness to Action	Managers and operational staff, all functions	2 days

THE AI OPERATOR PROFESSIONAL SERIES · FOR INDIVIDUALS

Six standalone professional courses. No prerequisites, and every course is assessed by practical exam, project or panel interview, never multiple choice. Taken in sequence they build a complete operator capability, from a validated idea to a launch ready business.

CODE	COURSE	FOCUS	LENGTH
101	The One Person Company Blueprint: Niche, Offer and Business Foundations	Business Foundations · Marketing	5 days
102	AI Agents at Work: Build Your First AI Workforce with Claude	Operations	2 days
103	The Knowledge Advantage: RAG Knowledge Bases and Your AI Team	Operations	3 days
104	Automate the Business: n8n Workflows, Integration and the Without-You Test	Operations · Marketing	4 days
105	Validate, Price and Sell: From Offer to Pipeline	Marketing · Sales	4 days
106	Launch Ready: Registration, Money and the Readiness Check	Operations · Business Foundations	3 days

HOW THE TWO SERIES FIT TOGETHER

Organisations see the strongest results running the Adoption Series in sequence: AI for Leaders creates the mandate and the roadmap, AI at Work equips the teams who deliver it. Individuals who want to go further progress into the AI Operator Professional Series, where they build AI agents, knowledge bases and business automations of their own. The Adoption Series teaches organisations to use AI. The Operator Series teaches individuals to run it.
